MEMORANDUM FOR THE DDCI

SUBJECT : Agency's Entry on Duty Processing System - Inspection Report

REFERENCE: Your memo dated 13 January 1983, same subject

1. Referent memorandum addresses both the Career Trainee program and EOD processing across-the-board, and calls for a status report. The Inspector General's report on EOD processing has been received and will be sent to you separately. It contains eleven recommendations, eight of which represent improvements to the existing system, are not controversial and are being implemented or are easily implementable. The remaining three (Nos. 8, 9.a. and 9.b.) call for organizational changes and a new applicant processing system, with which there are strong reactions from OP, OS or OMS. Certainly decisions on these recommendations will affect future CT processing as well as your charge to streamline the whole system.

Overall Applicant Processing

6. Attached is a brief report from Jim Glerum, summarizing the visible beginnings of changes introduced in the existing EOD processing system. Included are a reflection of better focused requirements, a reduction in the pipeline of 35%, OMS reduction in PATB processing time, gain from the security expeditor effort and a doubling of OS polygraph capability beginning this month.

7. Also relevant to streamlining, of course, is the planned location of interacting OS, OP and OMS entities in the new [redacted] I have told [redacted] and Jim 25X1|
that a desirable goal would be to have made sufficient progress on the CT front (as well as other processing areas) that we could abolish the Task Force at about the time the last unit moves into [redacted] assuming that will occur toward the 25X1
end of the calendar year.
